

**InTank FITT® *SuperYacht* offers the smallest footprint of any Ballast Water Treatment System on the market.**

**How is InTank FITT® *SuperYacht* different from regular InTank FITT®?**

- Both the bulk chemical tank and the dechlorination tank are mounted on the main skid.
- The color of the system can also be matched to the color used on all other equipment in the engine room.

- Installation can be containerized or modular.
- InTank FITT® *SuperYacht* treats ballast water from mega-yacht/fishing boat to commercial trading vessels.
- Up to 800m<sup>3</sup> ballast water can be treated.
